---

4 years' experience translating complex data into insights, decisions, actions, and value. Broad experience from early-stage startups to SMID caps to consultancy, spanning biopharma, AI applications, due diligence and strategic evaluation. Trilingual and globally experienced across London, Oxford, Shanghai and Hong Kong.

## WORK EXPERIENCE

**2025- Consultant (Nov 2025 – current)**  
*Stealth AI-biopharma startup, San Francisco (remote)*

**2022-25 Drug Development Analyst (Nov 2022 – Oct 2025)**  
*Weatherden Limited, London*

### Organisational Data and AI Transformation:

- Led **digital transformation and AI automation in organisation** – built data pipelines, BD support tools, and developed analytical templates adopted firm-wide (assumption audit framework) to streamline workflow and cross-functional collaboration
- **Consolidated siloed CRM and data system**, improving visibility and saving 10+ admin hours/week

### Client Project Delivery:

- **Led and supported 10+ strategy and clinical development projects**, delivering recommendations to guide investment, partnering strategies, and portfolio decisions for biopharma and fund clients  
*Select projects include:*
  - ◆ **Obesity investment due diligence** for a healthcare fund
  - ◆ **Asset search and evaluation for in-licensing** for an APAC biopharma
  - ◆ **Portfolio evaluation, diligence support and clinical development strategy** for multiple biotechs
  - ◆ **Strategic pathway analysis** for a regenerative medicine stealth

### Internal Equity Research:

- Delivered **20+ earnings reports** on **large cap pharma**s, synthesising business strategy updates

**2021-22 Analyst to BD Associate (Sep 2021 – Nov 2022)**  
*Vatic Health Limited, Oxford*

- Led internal manufacturing scale-up, building an **inventory and yield forecast model** to project material requirements, aligning sales, procurement, and regulatory submission timelines
- **Diligenced target expansion markets (COPD and IBD)** via KOL calls and secondary research

## EDUCATION

**2024-25 AI and Data Science Apprenticeship (Level 7, Master's level), Cambridge Spark, London**  
Merit, Top 5 | Skills: ML modelling and development, neural networks, AI explainability, GenAI

**2019-20 Professional Placement Year, University of Oxford, Oxford**  
Thesis grade ~80% | Skills: glutamate metabolism research, iPSCs, astrocytes, wet lab techniques

**2017-21 MSci Pharmacology, King's College London, London**  
1:1 | Best MSci Project (Bioinformatics), Best MSci Student (George Brownlee), Best First-Year BSc

**Languages:** English (native), Cantonese (native), Mandarin (advanced), Japanese (intermediate)

**Skills:** Python, R, SQL, ML modelling/forecasting, ML development, Neural networks, Agentic AI (n8n)

**Tools:** Google/Microsoft office suite, AlphaSense, Citeline, Cortellis, Notion, Slack, Miro, Whimsical

**Interests:** Flute (Diploma LTCL), Double bass (Grade 8), Piano (Grade 8), Classical music, Chess
